

A new water storage graphic is available online. This image shows current storage for the State's major reservoirs, with both percent of average for time of year, as well as percent of capacity. The high supply numbers are thanks to carryover from last year being a wet year.

http://watersupplyconditions.water.ca.gov/current_conditions.pdf

As of the April 1 Summary of Water Conditions, most larger reservoirs are near 80% of their capacity.

The net full Weather and Climate Newsletter will be out later this week.
